The New Ford V8

The new Ford V8 for 1935, presenting a new conception of beauty and comfort in the modern automobile, was announced today by T. S. Hughes, local Ford dealer.

Most striking feature of the new car is body lines which are distinctive modern and a definite departure from any previous Ford design. The car's curves are approximately eight inches longer from bumper to bumper. Seats are as much as 2 1/2 inches wider, and front seat leg room has been increased.

The car also embodies a combination of major engineering developments aimed at increasing riding comfort—which has been called the center-pole ride. These changes include moving the engine forward more than eight inches over the front axle, a longer front spring placed four inches forward, a straight instant-on front spring, and a total spring deflection of 12 inches on the chassis of 12 inches wheelbase. The frame is placed lower, and 6.00 by 16 inch tires carrying less air pressure are fitted. There are four double acting hydraulic shock absorbers. The front end of the car is more than two inches wider.

Two improvements have been made in the Ford V8's engine, and so the new car will cost less than \$1,200, even on the road. Directed low crankcase ventilation

Then Mr. Winter received four great boxes of treats from Santa Claus via the Sunday School by post and P. Express. Last the Scouts and Guides of Calgary sent a jolly good programme. Mrs. H. Albeit it was a great crowd and the game was a good one. The winning side was the Strathmore team with R. S. Stockton and Jim Swanson carrying off the consolations.

Someone must draw the lucky ticket and win the radio to be drawn for at the Nightshade dance January 15th. Have you bought yours yet?

THE STRATHMORE & BOW VALLEY STANDARD OF OCT. 2, 1905

A present resident of Strathmore in looking over her papers one day recently found among them a copy of the first issue of The Strathmore Standard—which she (Mrs. Devitt) brought in for our perusal.

There is of course a copy of this paper on the office files, but a great sentimental value attaches to one preserved outside, as this one has been, so we are using this copy to illustrate a little, in this first issue for 1935, 25 years after.

The following descriptive article appears on the front page:

Bow Valley, Past, Present and Future

Twenty five years ago this white settler was an almost unknown place, the beautiful Bow Valley and the acreage in that fertile area under cultivation was infinitesimal. From Mr. Cushing, in a recent speech given at the district meeting, Mr. Macleod of the Bow River, that a striking instance of the condition of the country in the eighties.

But now the scene is changed, and changed in a more marvelous manner than even the most sanguine of the early pioneers could either have hoped or dreamed of. From being a treeless, unpopulated plain, with hardly a vestige of human activity, save at the dwellings of the nomadic Red Indians the whole of the valley of the Bow is now dotted over with smiling homesteads, while at intervals of every 10 miles or so along the railway line are thriving centers of commerce, where the farmer exchanges the crop which he has garnered from the wonderful productive soil for the necessities and luxuries with which the merchant can supply him, and also for the implements and capital with which he can produce larger crops and correspondingly larger profits.

What is the reason for this great change between the Bow Valley of today and the Bow Valley of 25 years ago? The answer is that to no single cause can be ascribed the reason for the transformation.

A fusion of all that is best from all the white nations of the world, they have used the most approved methods to the science of agriculture, have worked energetically, so that today the Bow Valley is the granary of Alberta and the Mecca of the transmontane.

The religious and moral progress of the district has kept pace with its material advancement. The people are scattered up and down its entire length and breadth, while the cause of law and order is being carried on by his son Leonard. A hardware specialty business was carried on by C. W. Chase where Wm. Crow now has a shoe and slippers, bowties and salmons, general store, the first name refers to Mr. Jack Downie, now of Glenora. R. McLean, proprietor of the Pioneer Meat Market was an uncle of Miss Mary McLean of the C. P. R. office staff. A farmer in the district Mr. John Williamson is credited with having raised a quantity of oats to the acre and 46 lbs to the bushel. The name of G. W. Kuyvetav appears as proprietor of the grocery and salubrious. At the top of the editorial column are the names W. Park Evans, who passed on some five or six years since, whose son is now residing in the United States and Mr. John McKenzie who is now publishing The Rothsay Express, Rothsay, Scotland.

So the vision changes.

In our next issue will appear an account of the first Strathmore wedding

SPORT NOTES

RED WINGS LOSE TO CANNORE, DEFEAT BANFF 3-0

The local hockey team journeyed to the mountains over the week end to oppose Cannore and Banff in two regular league games.

They came out on the bottom at 11 to 1 score at Cannore on Friday night at Cannore, the Wings' defense not being able to stop the fast combination plays of the Cannore team. Cannore scored four in the first three in the second and four in the last period of the game.

Bill and Gene Gloux scored the goals for the locals in this game.

On Saturday the Wings had the necessary push to come out at Banff. This victory over the fast skating Banff outfit shows that the Wings were playing a much improved game from what they did at Cannore the night before.

Charlie Gloux, R. Christensen and Jack Grellin scored for the Wings in this game.

How they stand in the Bow Valley League.

WORSER AND WORSE

The great men are all dead, she said, with evident regret.

But the beautiful women are not. He replied, looking earnestly at her.

Of course, she added, after a moment's reflection, I always expect preposterous company.

So do I, he replied.

NOTABLE PROGRESS MADE BY ROYAL BANK OF CANADA

Deposits increase \$50,000,000—Liquid Assets \$382,712,787—Profits Double

The financial statement of The Royal Bank of Canada for the year ended November 30, 1934, reflects a period of improved business conditions. Figures of total assets deposited, cash investments, commercial loans and note circulation all show an increase during the year.

Total assets are \$758,423,004 of which \$382,712,787 are liquid, being 50.3 per cent of total liabilities to the public, compared with 55.7 per cent a year ago. Cash, cheques and bank balances aggregate \$168,883,021 or 24.3 per cent of public liabilities.

Government and municipal securities have increased during the period from \$113,782,602 to \$132,220,489.

Big Gain in Deposits

The outstanding feature of the statement is the increase of \$50,564,124 in public deposits. Of this increase it is understood that \$41,247,124 is in Canada, the balance abroad. Canadian savings deposits being up \$11,236,336.

After a steady decline in commercial loans of banks in Canada over the period of the past few years it is encouraging to note as further evidence of business revival that the Royal Bank's figures over the week end to oppose Cannore and Banff in two regular league games.

Canada Makes Progress Says Beatty

C.P.R. President Reviews Past Year and Finds Evidence of Permanent Economic Improvement in Advances for Far made—Predicts Canadian Wheat as Best in the World will find Steady Market.

THE course of our recovery from the economic catastrophe swept over the world in 1929 and 1930 has been markedly different from that of any of the previous cases of business depression in our country. This time we seem to be experiencing a process of slow rebuilding and, as far as I am concerned, one of permanent readjustment of economic conditions. The conditions which have radically and permanently changed. What are today experiencing is a process of slow rebuilding and, as far as I am concerned, one of permanent readjustment of economic conditions. The conditions which have radically and permanently changed. What are today experiencing is a process of slow rebuilding and, as far as I am concerned, one of permanent readjustment of economic conditions.

Throughout the past year the matter of the country's indebtedness has received an increased amount of public attention and I am convinced that proposals for the solution of our financial problems are being considered with more interest and to find out if they really are as dangerous as those who early rushed into print to attack them would seem to believe. This is all to the good. If unfilled management will not stand up under the most searching criticism, obviously, it should not so forward. But the fact that I can see so honest and it should be based upon a fairly sound understanding of the country's economic condition. I say this because the country is not in a position to stand up before the world as a nation that has not passed the above tests. I shall not further deal with the matter here, but I think it is safe to say that I can see no other way than united railway ownership and private ownership to increase the population of Canada.

It appears to me that we can do this with some confidence, as a year during which found that the world was not in a position to stand up before the world as a nation that has not passed the above tests. I shall not further deal with the matter here, but I think it is safe to say that I can see no other way than united railway ownership and private ownership to increase the population of Canada.

Both Canadian railway systems as well as the railways of almost every modern nation, have suffered from some extent from the growth of highway transportation. The general use of private ownership motor cars and the increasing amount of pleasure travel in motor cars has led to the construction of a great network of modern highways, and ordinary common sense.

Ring out a slowly dying cause,
And ancient forms of party strife;
Ring in the nobler modes of life,
With sweeter manners, purer laws.

Ring in the valiant men and true,
The larger heart the knicker hand
Ring out the darkness of the land,
Ring in the Christ that is to be.

The New Ford V-8 for 1935 is the biggest and roomiest Ford car ever built. It is a strikingly handsome car, with modern lines and new, luxurious appointments.

But most important of all it is especially designed to give you smooth, easy riding over all kinds of roads—a front-seat ride for back-seat riders.

This ease of riding is achieved by the use of three basic principles never before combined in a low-price car.

1. Correct distribution of car weight by moving engine and body forward eight and a half inches.

2. New location of seats by which the rear seat is moved forward, toward the centre of the car away from the rear axle and away from the bumps.

3. New spring suspension which permits the use of longer, more flexible springs and increases the springbase to 123 inches.

A New Ford V-8 That Brings New Beauty,
New Safety, and a New Kind of Riding
Comfort Within Reach of Millions of People

The result is Centre-Poise—which not only gives you a new riding comfort but adds to the stability of the car and its ease of handling. You can take curves from seven to eight miles faster with perfect safety.

There are many new features in the Ford V-8 for 1935 which make the car still easier to drive. New brakes give more power for stopping quickly with far less foot pressure on the pedal. A new type of easy-pressure clutch employs centrifugal force to increase efficiency at higher speeds. New steering mechanism makes the car still easier to handle.

The New Ford V-8 for 1935 retains the V-8 engine which has demonstrated its

dependability and economy in the service of over a million owners. There are refinements, but no change in basic design. You buy premium performance when you buy this Ford V-8—full 90 horsepower and 85 miles an hour.

We invite you to see this New Ford V-8 at the showrooms of Ford dealers. You will want to ride in it to drive it yourself. You will find it a new experience in motoring.
